Bale cutter Power Cut

The power
brand

Bale cutting
made easy

Feeding with round bales

Daily feeding is made a great deal easier

On many farms, bale silage is a popular alternative or supplement to the classic silage stock. To simplify the delivery of feed, the POWER CUT here can help by saving time. With the MAMMUT round bale cutter, bales of silage, hay or straw can be split up quickly and economically, prepared ideally for further processing.

THESE ARE THE ADVANTAGES OF MAMMUT POWER CUT

Low resistance of the cut

The aggressive welded blade made of HARDOX steel cuts the round bales effortlessly and without much operating pressure.

Universal attachment

All attachments are bolted and are therefore easy to replace – providing convenience as well as maximum flexibility.

Time-saving

To transport 2 bales, there is also the option of bolting on additional fork tines.

Maximum stability

The big main mounting pins deliver optimum stability and load-bearing capacity – there is no need to have a volume distributor valve.

Technical data

Total width	1795 mm
Net weight	430 kg
max. bale diameter	1800 mm
fork tine diameter	50 mm
Cylinders Ø (2 pieces)	110 mm

Subject to technical changes

Accessories

- Various attachment variants
- two additional fork tines
- Drive-in hopper
